

Food Safety, Compliance & Regulatory Statement

Gleam Chemicals Australia recognises that food safety and workplace safety are critical priorities for organisations involved in the preparation, manufacture, and service of food and beverages, as well as for the protection of public health and staff wellbeing.

We are committed to delivering approved, effective, and compliant products, programs, and services that support the highest standards of hygiene, safety, and operational performance across all industries we serve.

All Gleam Chemicals products are manufactured and supplied in accordance with relevant Australian and New Zealand regulatory frameworks, standards, and guidelines, including:

- **FSANZ (Food Standards Australia New Zealand)** – ensuring compliance with national food safety standards
- **NSQHS (National Safety and Quality Health Service Standards)** – supporting safe and quality healthcare environments
- **NHMRC (Australian Guidelines for the Prevention and Control of Infection in Healthcare)** – aligning with best practice infection control
- **ARTG (Australian Register of Therapeutic Goods)** – for applicable regulated products
- **AS 5369:2023** – reprocessing of reusable medical devices (superseding AS/NZS 4187:2014 and AS/NZS 4815:2006)
- **WHS (Work Health and Safety Regulations)** – ensuring safe handling, storage, and use of all chemical products
- **GHS (Globally Harmonised System of Classification and Labelling of Chemicals)** – providing consistent hazard classification, labelling, and Safety Data Sheets (SDS)

Gleam Chemicals food-safe products are formulated to meet strict safety requirements, including suitability for incidental food contact, when used in accordance with product labels and Safety Data Sheets.

Usage & Safety Requirements

- All products must be used strictly in accordance with label directions and SDS instructions
- Products not classified as food-safe must be thoroughly rinsed with potable water after contact with food preparation surfaces
- Appropriate personal protective equipment (PPE) must be used in line with WHS guidelines
- Staff should be trained in correct chemical handling, dilution, and storage procedures

Gleam Chemicals maintains a strong commitment to continuous improvement, regulatory compliance, and the delivery of solutions that protect people, products, and businesses.

To Whom It May Concern,

This is certifying that Gleam Chemicals Food Grade products meet the guidelines of AQIS for incidental contact with food.

It is recommended that products are only used in accordance to the label direction for use.

Yours Sincerely,
E.P Kopinski
B.Sc., RACI
